

# INHNSeries

## Incremental Hollow Shaft Encoder

Maximum Increments ..... 50,000

Hole Diameter Range ..... 26 to 44mm

### MECHANICAL SPECIFICATIONS

RPM ..... Max. 5000  
 Torque ..... > 2Ncm  
 Loading ..... Axial 60N, Radial 80N  
 Weight ..... Stainless 1350g - Aluminium 720g  
 Temperature ..... -20°C to +70°C

### ELECTRICAL

Current consumption ..... Max. 40mA  
 Signal frequency ..... 300kHz  
 Switching load - Short circuit protected ..... 40mA

### FEATURES

The INHN industrial encoders are designed for mounting directly onto the drive shaft of motors and other rotary shafts. The hollow shaft system eliminates the necessity for most additional fixing hardware, such as flexible couplings, drive belts and mounting plates or brackets.

To mount a hollow shaft encoder simply slide the encoder onto the drive shaft, tighten the set screws and attach a simple torsion arm to prevent the encoder body from rotating.
