

INHP Series

Incremental Hollow Shaft Encoder

Maximum Increments 50,000

Hole Diameter Range 45 to 65mm

MECHANICAL SPECIFICATIONS

RPM Max. 5000
 Torque > 2Ncm
 Loading Axial 60N, Radial 80N
 Weight Aluminium 720g
 Temperature -20°C to +70°C

FEATURES

The INHP industrial encoders are designed for mounting directly onto the drive shaft of motors and other rotary shafts. The hollow shaft system eliminates the necessity for most additional fixing hardware, such as flexible couplings, drive belts and mounting plates or brackets.

To mount a hollow shaft encoder simply slide the encoder onto the drive shaft, tighten the set screws and attach a simple torsion arm to prevent the encoder body from rotating.

ELECTRICAL

Current consumption Max. 40mA
 Signal frequency 300kHz
 Switching load - Short circuit protected 40mA
